Dear Graduates,

Current conditions in the United States and around the world require a departure from traditional graduation messages this year. You will always be known in history as the Class of 2020, and people will know what that means. They will likely be sympathetic when you share your experience of life as a college student under quarantine and describe your virtual commencement ceremony. But I think the next part of the story will be what truly defines the Class of 2020.

We here at SUNY Corning Community College are proud to count you as alumni of our college. Earning a diploma or certificate under these most challenging of circumstances will forever make you unique. You adapted to the rapid shift to distance learning in light of COVID-19 and persevered on your computers in the final weeks of the semester to complete your studies. Your professors have indicated that you have demonstrated the knowledge, skills, and competencies in accordance with the high standards of our programs and have met all of the requirements necessary to be awarded your credential. You should take great pride in that achievement.

You have also demonstrated great resilience as a member of the graduating class of 2020. I encourage you to always remember how you were able to dig deep when confronted with this challenge. If you draw upon that memory as you leave SUNY CCC, moving onto a four-year university or into the workforce, you will continue to succeed. The true story and the enduring legacy of the Class of 2020 will not be what you did during the coronavirus crisis but rather what you did after. I am betting that you will continue to amaze.

Congratulations and best wishes to all of our graduates.

William P. Mullaney, Ph.D.
President, SUNY Corning Community College

SUNY Corning Community College Regional Board of Trustees

Carl H. Blowers, Chair
Nancy M. Wightman, Vice Chair
Michael J. Wayne ’80, Treasurer

Anna Moretti ’20, Student Trustee

Tri-County Legislative Chairs
Mr. David Manchester ’71, Chemung County
Mr. Carl H. Blowers, Schuyler County
Mr. Scott J. Van Etten, Steuben County
HISTORY OF THE COLLEGE

Under the sponsorship of the Corning-Painted Post School District, Corning Community College opened its doors in September 1958 with eight faculty members and a student body of 118. The new college was led by 32-year-old Dr. William Lee Perry and started in a Corning School District building on Chemung Street.

By 1960, the College enrollment increased to 350 full-time students and 260 part-time students, with the number of faculty doubling to 16. The College continued to grow and began looking for a permanent home. In October 1960, thanks to a generous gift of land by Arthur A. Houghton, Jr. and a $2,250,000 donation from Corning Glass Works Foundation, the College began construction of a new campus on Spencer Hill. Dr. Perry spearheaded the planning, design, and construction of the College on Spencer Hill, and classes began on the hill the fall of 1963. The campus was formally dedicated in May 1964, and it received its first Middle States accreditation in June of that year.

When Dr. Perry left in June 1966, full-time faculty had grown to 70, with the College organized into six academic divisions. Dr. Robert W. Frederick, Jr. became the College’s second president in July 1966. The College celebrated its 10th birthday in 1968 with a graduating class of 524—nearly 10 times the size of the first graduating class in 1960. In 1970, the College added the Nursing Building, increasing classroom capacity by 25 percent. Then in 1971, a new maintenance building helped increase classroom space by moving maintenance staff out of the academic buildings. When Dr. Frederick left the Presidency in 1975, the number of full-time faculty had risen to 84, and the College had expanded to eight academic divisions. Also, the Goff Road building had been added to the College’s facilities. When Dr. Donald Hangen accepted the position as the College’s third president, the student body had grown to 1,952 full-time and 832 part-time students.

Dr. Hangen served the College as president until 1994. His administration saw the addition of the Learning Resource Center, the Business Development Center, and the Eileen Collins Observatory. In 1993, the College had 1,717 full-time students and soared to 2,221 part-time students. The combined full- and part-time students accounted for the greatest number of credit hours taught in the College’s history. It was also the second year that part-time headcount would exceed full-time headcount, a trend that has remained consistent to the present time. A critical change in the College’s operation occurred in the middle of the Hangen administration as the Corning-Painted Post School District became unable to sustain financial support of the College. After considerable effort, the College developed into the first regional community college in New York. Unlike other New York community colleges, Corning receives funding from Steuben, Chemung, and Schuyler counties through a charge-back system that provides revenue based on the number of students from each county. Under this system the College continues to prosper. When President Hangen retired in 1994, Dr. Eduardo Marti became the
College’s fourth president who continued the expansion of the College. By the time Dr. Marti left in 2000, the College had added the Planetarium and the Airport Corporate Park facility, housing automotive and machine tool technology programs.

Dr. Floyd “Bud” Amann became the College’s fifth president in May 2001. In the fall of 2009, the College saw enrollments of 2,559 full-time and 3,113 part-time students, a far cry from the 118 students in 1958. The College also saw tremendous growth in its off-campus enrollments, including a near doubling of students in its high school concurrent enrollment program.

In August 2007, the Academic and Workforce Development Center in Elmira opened its doors to address the need for skilled employees, to attract new jobs to the region, and to assist the success of entrepreneurs and established businesses. The Center now houses many credit and non-credit courses, including the new welding facility, while also housing community service partners.

During the summer of 2011, the College welcomed Dr. Katherine “Kate” Douglas, the College’s sixth president. During her first year in office the entire campus community engaged in a deliberative examination of the College’s mission, vision, and values. Dr. Douglas’ inauguration ceremony was held in April 2012, and shortly thereafter, the College kicked off a Strategic Planning effort to focus on the College’s strengths and move the institution forward.

Following two years of careful study, the College’s Regional Board of Trustees unanimously approved student housing on the hill, and construction of the three-story residence hall began with a groundbreaking ceremony in April 2012. The $16.8 million building initiative was underwritten by the Corning Community College Development Foundation using no public funds. In March 2013, the College’s Regional Board of Trustees voted to honor Dr. William Lee Perry, founding president of Corning Community College, and his wife Carolyn Perry, by placing his name upon the new residence hall. Perry Hall was completed in August 2013 allowing the College to welcome its first residential students for the fall of 2013 semester. Members of the Perry family – along with members of the College community from past and present – attended the Hall dedication on May 23, 2014, exactly 50 years to the day of when the Spencer Hill campus was dedicated by President Perry.

In January 2013, bringing closure to a facilities planning process begun in 2007, the College’s Regional Board of Trustees approved a renovation and renewal plan for the Spencer Hill Campus. The plan included renovations and an addition to the Arthur A. Houghton, Jr. Library, the Student Commons building, and the Gymnasium along with construction of a new turf field. The $23.3 million investment of these projects was celebrated with a groundbreaking ceremony in April 2014 attended by federal, state, and local dignitaries. Work on these three projects was completed in March 2015. The Author A. Houghton, Jr. Library opened in January 2015.
In March 2015, SUNY Corning Community College held the ribbon cutting for its state-of-the-art welding facility in the Academic and Workforce Development Center in Elmira for its non-credit Welding Technology Program.

In April 2015 the College underwent its accreditation visitation by the Middle States Commission on Higher Education, with the visiting team reporting that SUNY Corning Community College met or exceeded all fourteen of its standards of excellence.

In 2016, the College was ranked the top two-year college in New York State and welcomed the first class of students to the Southern Tier STEM Academy. Construction began on the Health Education Center, a new state-of-the-art complex designed to serve the educational needs of aspiring healthcare professionals. The College received its first $1 million gift from an individual donor, Professor Emeritus Walter R. Smith, to endow a Visiting Scholar program in his name.

In 2017, the College launched a new academic program, Community and Public Health, saw the Red Baron mascot advance to the Final Four of SUNY’s Mascot Madness annual competition, and welcomed the largest entering class of Nursing students to the technology-rich Health Education Center.

In 2018, the College renamed several buildings in recognition of the support received from our sponsor counties. Schuyler Hall, Steuben Hall, and Chemung Hall are now central to the student experience at SUNY CCC. In 2020, the College launched a public/private partnership with Siemens and celebrated the ceremonial groundbreaking for the STEAM Innovation Center, the future home for the Mechatronics academic program and the Innovation Hub, where interdisciplinary research will spark new discoveries.

In the summer of 2019, CCC welcomed Dr. William P. Mullaney to serve as the College’s seventh president. His vision for equity in education along with advocacy for STEAM innovation and continued expansion of healthcare programming continues to inspire excellence.

All of us at SUNY CCC recognize, embrace, and celebrate the changing future we are creating together for our students and our communities. We are striving to build a socially, environmentally, and economically sustainable academic enterprise dedicated to transforming the lives of our students, strengthening our communities, and inspiring success that lasts a lifetime. SUNY Corning Community College remains a strong and vibrant institution dedicated to serving the educational and cultural needs of our students and our surrounding communities.
THE MACE

If a college mace traditionally represents the authority of the college faculty and the hope for excellence, it is appropriate that the mace of SUNY Corning Community College was commissioned by the faculty of this institution. In 1960, the faculty created a fund for a permanent gift to thank the community and friends of the College for their support. Robert Goodden of the Royal College of Art in London was brought to Corning in the fall of 1961 to meet with a committee of the faculty to ascertain the spirit that this modern mace was to symbolize.

It was agreed that the mace would be crafted in silver of a modern design, and that it was to express the hope, liveliness, and excellence inherent in the beginning of any institution of higher learning. At the same time, the faculty wished the mace to be an expression of the mind of a creative artist, and thus the design and execution of this work of art was placed in Robert Goodden’s hands without restriction.

The mace was crafted in London at the Royal College of Art, by members of the Worshipful Company of Goldsmiths, to Professor Goodden’s design and under his direction in 1964. The crystal apex was formed by the artists of Steuben Glass.

SUNY CCC tradition affords the honor of carrying the mace to our most senior, longest serving professor.

THE MEDALLION

SUNY Corning Community College’s inaugural medal was commissioned in spring 1967 and was presented to President Robert W. Frederick, Jr. on May 18, 1967. The medal, designed by John M. Runyon, then Associate Professor in Art, is cast of silver. The center design has four points, representing the community, Trustees, Students, and Faculty. The raised center represents the presidency, which draws together and fuses the endeavors of each of the points.
FACULTY ACADEMIC ATTIRE

The caps, gowns, and hoods worn at college and university functions date back to the Middle Ages. Monks and students of those days wore them to keep warm in the damp and drafty 12th-Century castles and halls of learning.

When colleges came under secular control in the 1300s, particularly in England, a touch of color was added to the academic garb. Thus the gown for graduates of many English universities is of a scarlet color. With the founding of colleges in the American colonies, the tradition of the academic gown became established on this continent as well.

The academic hood originally formed the cowl worn as a head covering by the monks. It could also be worn as a shoulder cape, or could be used as a bag for the collection of alms, or for carrying books. The length of the hood indicates the degree earned, the doctoral hood being the longest. The hoods are lined with silk in the color of the college or university that conferred the degree, and colored velvet which signifies a particular field of learning.

</table>

Today’s candidates for associate degrees and certificates are wearing gowns similar in style to those worn by candidates for the bachelor degree minus the hood. Their caps are worn with the tassels hanging on the right side until the degree is actually conferred whereupon the tassel is moved to the left side.

STUDENT REGALIA

Red Baron Leadership Academy
The white stole and red lettering signify membership in the Red Baron Leadership Academy. Graduates wearing these symbols have met all requirements for completion of the academy.

Phi Theta Kappa International Honor Society
The gold stole and gold tassel signify membership in Phi Theta Kappa International Honor Society of the Two-Year College. Graduates wearing these symbols have achieved a cumulative grade point average of 3.5 or above.

Collaborative Online International Learning
Faculty and students in COIL (Collaborative Online International Learning) classes celebrate their online partnerships, this year with classes in China, Mexico, and Scotland. Students wear pins and faculty wear sashes that represent the country of their partner class.

Pennons
This ancient symbol marks the accomplishments of those who are being honored at this commencement ceremony. The five pennons represent the certificate programs and the four associate degrees offered at Corning Community College: A.A., A.S., A.A.S., and A.O.S. A pennon became the symbol of achievement during the Middle Ages and, as such, the degree pennons used in today’s ceremony symbolize the achievement of this College’s graduates. A long, narrow flag or streamer, triangular and pointed, the pennon was formerly attached to the head of a lance and was borne as a distinction by the knight. Upon the performance of any gallant action by a knight or his followers, the triangular point of the pennon was cut off, thereby converting it into a banner of distinction and achievement.

Presidential Scholars Medallion
The medallion is on a red ribbon, symbolizing membership in the CCC Presidential Scholars program. Presidential Scholars are first-time, full-time students ranked in the top 10% of their high school graduating class, earning Regents diplomas from an accredited high school in Steuben County, Chemung County, or Schuyler County.

Veterans
Students wearing red, white and blue tassels and cords have served in the United States Armed Forces.
CANDIDATES FOR THE ASSOCIATE IN ARTS
JUNE 20, 2020

A student earns an Associate in Arts degree by completing a minimum of 62 credit hours of course work with a minimum of 45 hours in the liberal arts and general education disciplines. Students earning an Associate in Arts degree are clearly bound for transfer to a four-year college and many have aspirations of earning a graduate or professional degree as well.

CANDIDATES FOR CERTIFICATES

June 20, 2020

A student earns a Certificate by completing a program core or concentration designed to provide a proficiency in a skill or knowledge set necessary for entry into the workforce. Certificates generally require completion of 30 or more credit hours of coursework.

A student earns an Associate in Applied Science degree by completing a minimum of 62 credit hours of course work with a minimum of 22 credit hours drawn from liberal arts and general education disciplines. The student also completes a program core or concentration of courses ranging from 25 to 48 credit hours based on a particular course of study. This concentration is designed to prepare students for entry-level positions in the workforce.

A student earns an Associate in Science degree by completing a minimum of 62 credit hours of course work with a minimum of 32 credit hours drawn from liberal arts and general education disciplines. An additional 30 to 40 credit hours are earned in a program core or major concentration of study. This concentration is chosen based on the student’s intended transfer major and may include technical, program, or free electives. Students earning an Associate in Science degrees are generally destined for transfer to a four-year college.
